FREYM, C.A.

QUALITY AND RELIABILITY IN OUR SERVICES

FREYM, C.A. is a Venezuelan company founded on August 28, 2002, in **Puerto Ordaz**, with **23 years of experience** and a strong track record in the **industrial market**.

The company specializes in the **maintenance and repair of centrifugal pumps**, providing services to the **hydroelectric, industrial, mining, oil & gas, chemical, metallurgical, marine, and agricultural** sectors throughout the eastern region of the country.

Its infrastructure, modern machinery, and highly skilled

workforce enable the company to provide **machining services, rotating component balancing, and the manufacturing of parts and spare components, ensuring efficient, reliable, and high-quality technical solutions.**

The corporate pillars of **FREYM, C.A.** are based on specialization in centrifugal pumps, service quality, technical solutions, the support of a committed and highly trained workforce, as well as a constant focus on continuous improvement, customer satisfaction, and efficient after-sales service, **ensuring strong business relationships and reliable results.**

Mission

To provide our customers with repair, maintenance, and technical consulting services for their hydraulic systems that comply with international quality standards and fully satisfy their requirements.

Vision

To be recognized as a company specialized in hydraulic systems, preferred by current and future customers for the quality of its services and technical solutions, driven by our commitment, dedication, continuous pursuit of improvement and service excellence, as well as our creativity in solution design.

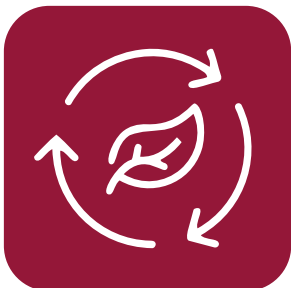

Values

CUSTOMER FOCUS:

We concentrate our efforts on our customers' specific requirements and support them in strengthening their performance and competitiveness.

SUSTAINABILITY:

We contribute to sustainable development, always seeking the best balance between environmental stewardship, social needs, and economic factors.

PERFORMANCE AND TEAMWORK:

We trust in the strength of teamwork to create synergy and fully achieve our potential.

FACILITIES

Our facilities cover 1,500 m², distributed as follows:

- 500 m² allocated to administrative offices, conference rooms, and dining areas.
- 1,000 m² dedicated to workshop operations, where maintenance, repair, machining, and manufacturing processes are carried out.

Machinery & Equipment

At **FREYM, C.A.** we operate a fully equipped workshop with **high-precision industrial machinery** and specialized technology for the manufacturing, repair, and maintenance of rotating and industrial equipment.

Our infrastructure allows us to handle large-scale and highly complex components, delivering **reliable, efficient results tailored to each customer's requirements.**

LATHES AND MILLING MACHINES

Heavy-Duty Engine Lathes
(TOS TRENCIN, Geminis, Vekta,
Yancheng):

- Designed for machining large industrial components:
- Maximum swing diameter: up to 1,200 mm, distance between centers: up to 3,000 mm
- High load-handling capacity for heavy components with tight machining tolerances

Universal Milling Machines (TOS
KURIM, PRVOMAJSKA):

- Equipped for machining flat surfaces, complex contours, and deep cavities with high precision and tight tolerances. These machines are essential for the manufacturing, modification, and fitting of industrial metal components.

BALANCING, ALIGNMENT AND TESTING

High-Precision Balancing Machine (PRECIBALANCE):

- Capable of balancing industrial components weighing up to 1.5 tons, ensuring vibration-free operation.

Laser Alignment System (SKF):

- Ensures precise shaft and coupling alignment in rotating equipment, reducing wear and extending equipment service life.

Electric Motor Test Bench:

- Allows performance testing and certification of electric motors after repair.

MOBILITY AND LOAD HANDLING

Lifting Systems:

- Lifting capacity of up to 10 tons for the safe handling of large industrial components.

Industrial Transport Vehicles (Hyundai y Chevrolet):

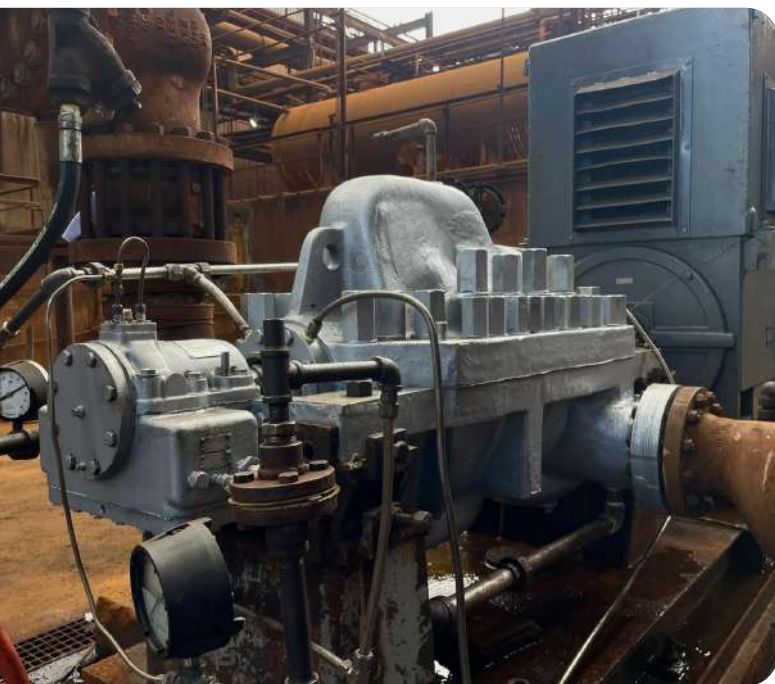

- Flatbed truck: 4-ton capacity
- Cargo truck: 3.5-ton capacity

Industrial Forklift:

- With a lifting capacity of 2.5 tons, optimizing the internal movement of components within the workshop.

Services

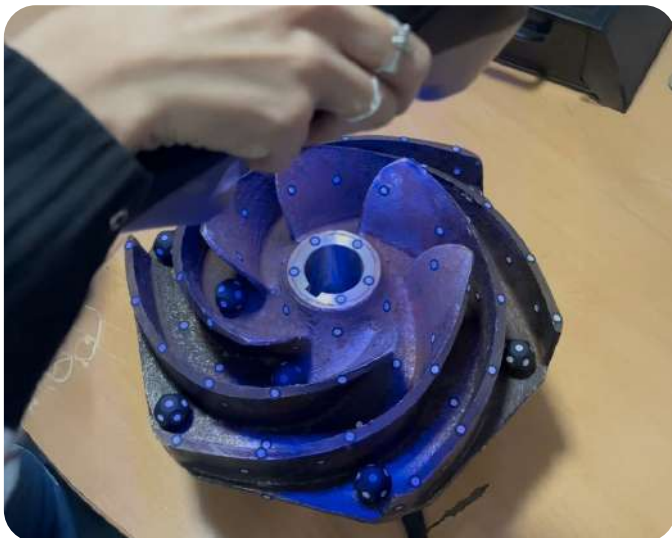

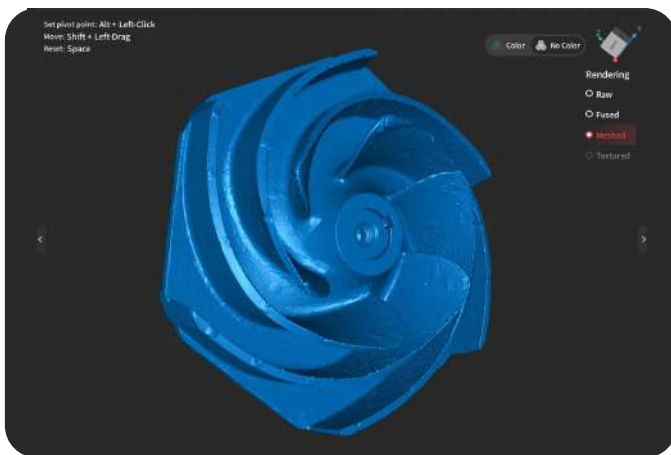

ROTATING EQUIPMENT MAINTENANCE AND REPAIR

MACHINING AND MANUFACTURING

REVERSE ENGINEERING

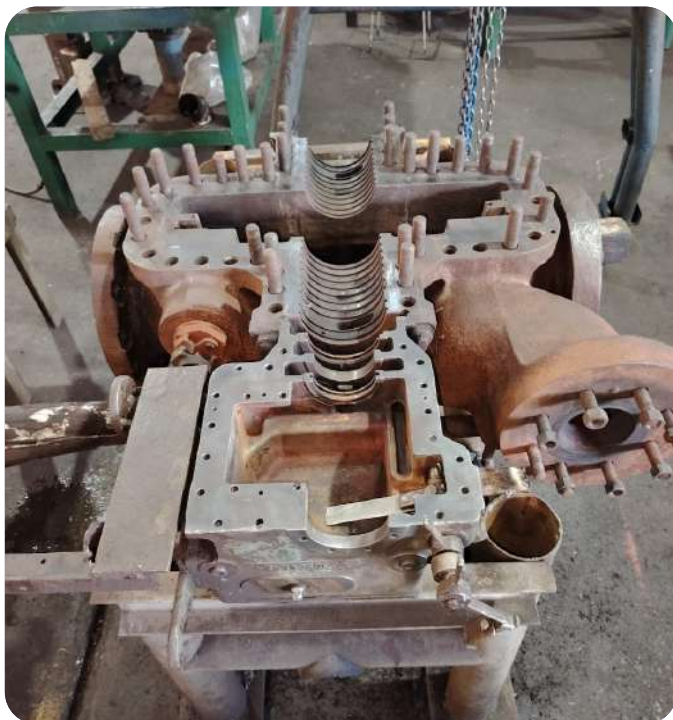

ROTATING EQUIPMENT BALANCING

LASER ALIGNMENT, ASSEMBLY, AND COMMISSIONING OF ROTATING EQUIPMENT
